WE DON'T MINE. WE RECOVER.

URBAN GOLD

Turning E-Waste into Wealth, Equity & Sustainability

A Circular Precious Metal Startup from India

IDEOLOGY BY // SUBHAM_DAS

E-WASTE EVERY WHERE

CRISIS_REPORT // INDIA_2026

01

India is drowning in waste

- Top global generator of electronic waste.
- Massive volumes of PCBs, CPUs, telecom & industrial electronics piling up daily.

02

Informal & Hazardous

- Rich in precious metals but treated poorly.
- Dumped, burned, or dismantled in backyards.
- Result: **Toxic pollution** and lost economic value.

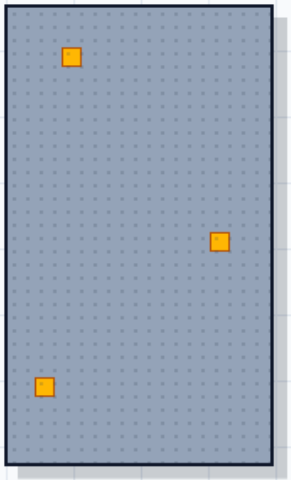

Today, we treat gold as trash.

THE HIDDEN OPPORTUNITY

E-WASTE IS RICHER THAN MINES

This is locked capital.

TRADITIONAL MINING

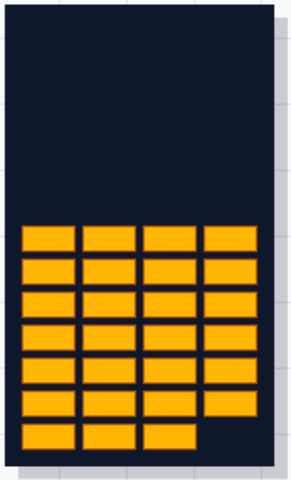

5g

Gold per ton of ore

Requires moving tons of earth, heavy machinery, and toxic chemicals.

URBAN MINING

300g+

Gold per ton of PCBs

KEY INSIGHT

60x higher concentration. Zero digging. Immediate access.

Higher Metal Concentration

Far more efficient than natural ore extraction.

Faster Recovery Cycle

Days to refine vs months to explore & mine.

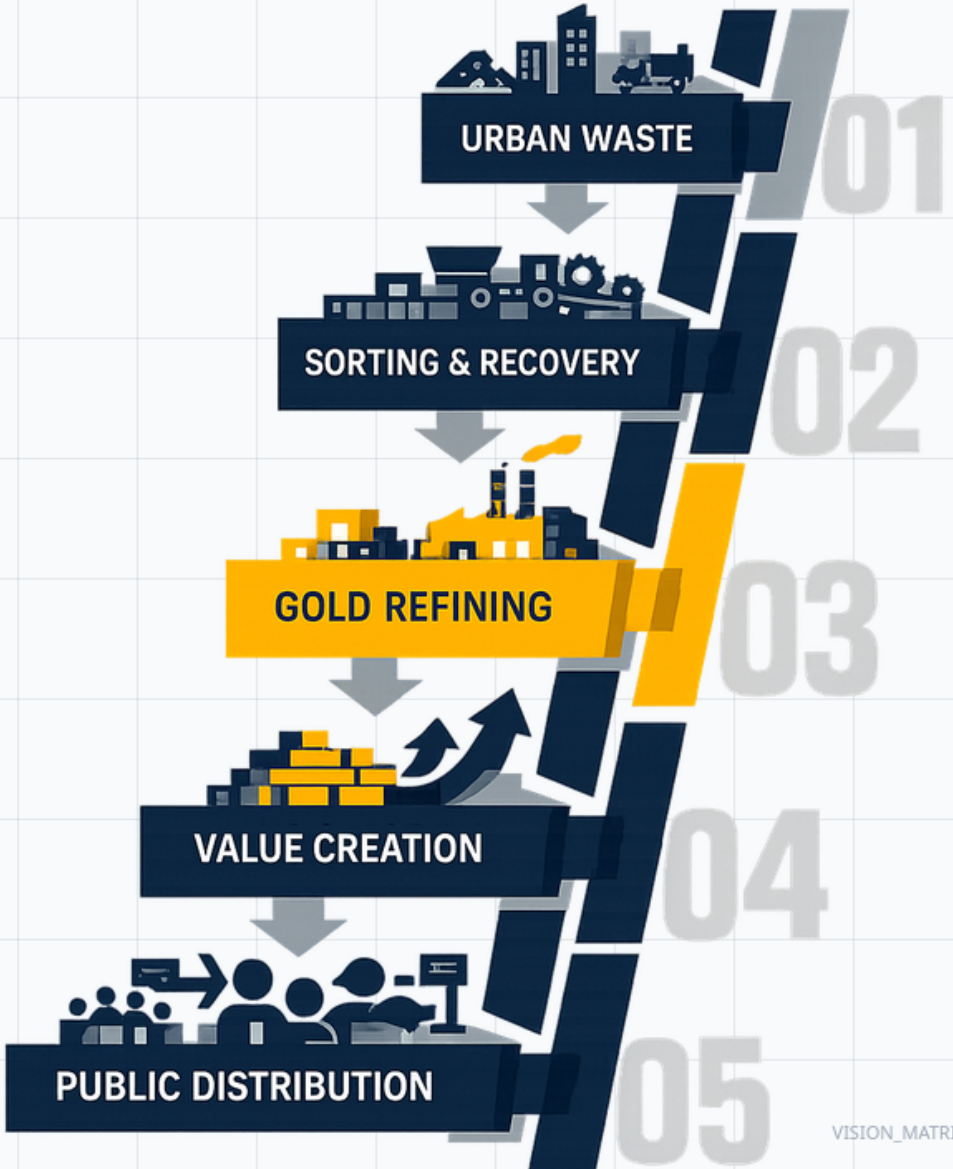

Eco-Friendly Process

Drastically lower carbon footprint.

Democratizing Gold through Circular Innovation

We are building India's most trusted urban precious-metal ecosystem, turning environmental liability into economic opportunity.

GOLD SHOULD NOT BE A LUXURY OF THE FEW

THE CORE IDEA

One Waste Stream. Multiple Value Streams.

NOTHING WASTED. EVERYTHING VALUED.

SCIENTIFICALY PROVEN RECOVERY

Urban mining, not backyard chemistry. We use industrial-grade processes to ensure maximum yield and safety.

PHYSICAL PROCESSING

Controlled dismantling. Safe, regulated disassembly followed by precision PCB separation and component sorting.

01

CHEMICAL EXTRACTION

CORE TECH

Multi-stage hydrometallurgy. Selective leaching and advanced filtration to recover Au, Ag, and Pd with minimal waste.

02

REFINING & PURITY

Electrorefining to 99.9% purity. Every batch undergoes certified assay to meet global bullion standards.

03

GOLD IS GOLD.

The atom doesn't care about its history.

MINED GOLD

RECYCLED GOLD

- Chemically Identical
- Globally Accepted
- Industry Ready

Purity is the only truth.

BUSINESS MODEL

PHASE 1: B2B RECYCLED GOLD

01

SELL TO JEWELLERY BRANDS

Supply certified recycled gold to major retail chains seeking sustainable sourcing partners.

02

SELL TO BULLION BUYERS

Direct liquidation of 99.9% purity bars to banks and traders at market spot rates.

03

GENERATE CASH FLOW

Rapid turnover cycles. From waste collection to refined gold sale in <14 days.

04

BUILD TRUST

Establish a track record of purity and consistency before launching consumer products.

We earn before we brand.

PHASE 2 / MARKET A

INDIA MARKET

AFFORDABLE GOLD

Accessible precious metals for the mass market. Driven by volume and daily utility.

LOWER MAKING CHARGES

Disrupting traditional jewelry pricing with efficient, machine-led craftsmanship.

800M+

ADDRESSABLE USERS

STRATEGIC DUALITY

PHASE 2 / MARKET B

EXPORT MARKET

PREMIUM PRICING

Commanding higher margins through certified circularity and purity standards.

SUSTAINABILITY STORY

Selling the narrative of "Healed Earth" to conscious Western consumers.

2.5X

MARGIN POTENTIAL

INDIA GETS ACCESS. **THE WORLD PAYS FOR ETHICS.**

IMPACT REPORT

SOCIAL IMPACT

We recycle opportunity.

Turning waste management into dignified, safe, and skilled employment for the informal sector.

12k+
LIVES IMPACTED

0%
HAZARD EXPOSURE

ECO-EFFICIENCY

LESS WASTE. MORE VALUE.

Every gram recovered is a gram not mined.

- Drastically reduced landfill mass
- Elimination of toxic groundwater leeching
- Zero-earth-displacement production

CIRCULAR ECONOMY

PLASTIC RESIDUE STRATEGY

Zero waste is a system.

We don't treat non-metals as trash. We transform 100% of polymer residue into industrial utility products.

1. STRICT SEGREGATION
2. POLYMER RECYCLING
3. UTILITY CONVERSION

> **FROM HOUSING TO HARD HATS.**
> NOTHING RETURNS TO EARTH.

WHY INDIA?

TIMING
NOW

STATUS
READY

01

3.2M TONNES / YR

MASSIVE E-WASTE

India is the 3rd largest generator globally. A limitless raw material supply growing at 30% annually.

02

LARGEST IMPORTER

INSATIABLE DEMAND

Culturally obsessed with gold. The domestic market absorbs everything produced instantly.

03

LOW COST HIGH SKILL

SKILLED LABOR

Generations of metallurgical expertise available at a fraction of global labor costs.

04

GOVT MANDATES

POLICY TAILWINDS

New EPR (Extended Producer Responsibility) laws strictly mandate recycling targets.

05

GLOBAL GATEWAY

EXPORT HUB

Strategic location to serve both Western luxury markets and Asian tech manufacturing hubs.

SLIDE 14 THE MOAT

COMPETITIVE ADVANTAGE

DIFFERENTIATION STRATEGY

WHY WE WIN

"WE DON'T JUST SELL GOLD.
WE SELL A CLEAN CONSCIENCE."

		INFORMAL SECTOR	TRADITIONAL RECYCLERS	CATEGORY LEADER URBAN GOLD
INTEGRATED MODEL	Collection to Product	✕	— Partial	✓ Full Stack
ETHICAL SOURCING	100% Traceable / Clean	☠	✓	✓ Certified
DUAL MARKETS	Domestic & Export	LOCAL ONLY	B2B ONLY	✓ B2B + B2C
ENTRY BARRIER	Tech & Compliance	LOW	MEDIUM	VERY HIGH

RISKS & MITIGATION

RISK ARCHITECTURE V1.0

ADULT TONE. HONEST ASSESSMENT.

THE CHALLENGE	THE SOLUTION
REGULATORY BARRIER **COMPLIANCE** Navigating India's complex e-waste management rules and pollution control board approvals.	STRATEGY **CERTIFICATION** Adhering to global R2v3 standards & ISO 14001. Using compliance as a competitive moat.
FINANCIAL RISK **HIGH CAPEX** Significant upfront investment required for advanced machinery and refining infrastructure.	STRATEGY **PHASED SCALING** Starting with modular units. Reinvesting early revenue from basic recovery into deep refining.
OPERATIONAL HAZARD **WORKER SAFETY** Handling hazardous chemicals and potential exposure to toxic fumes during extraction.	STRATEGY **STRICT CONTROLS** Automated enclosed systems. Zero-human-contact chemical processing. Continuous air monitoring.
MARKET BARRIER **TRUST DEFICIT** Skepticism about the purity and quality of recycled gold compared to mined gold.	STRATEGY **LAB TESTING** Every bar hallmarked and 3rd-party verified. Transparent blockchain traceability for clients.

LONG-TERM VISION

FROM STARTUP TO INDUSTRY STANDARD

PHASE 1 (1-2 YRS)

TRUSTED BRAND

Establishing 'Urban Gold' as the hallmark of ethical purity in B2B jewellery markets.

PHASE 2 (3-4 YRS)

MULTI-METAL EXPANSION

Deploying recovery lines for Silver, Platinum, and Palladium from industrial catalysts.

PHASE 3 (5+ YRS)

POLICY INFLUENCE

Setting the national standard for e-waste audits and circular economy legislation.

THE GOAL

LEGACY COMPANY

Building India's first fully circular precious metal ecosystem that outlives its founders.

NOT JUST A STARTUP. AN INSTITUTION.

URBAN GOLD

OUR PROMISE

WE DON'T MINE THE EARTH. WE HEAL IT.

This is not just a startup. It's **repair**. It's **inclusion**. It's giving gold back to the **people**.
